- ▶ Vite
- ▶ Axios

### Other

- ▶ Payment Systems
- ▶ Responsive Web Design
- ▶ Team Collaboration

## LANGUAGE

English (Professional)  
Amharic (Native)

## PROFILE

As a dedicated Full Stack Web Developer based in Addis Ababa, Ethiopia, I bring a unique blend of creativity and technical expertise to every project. My education at TVET college in the Mechatronics department has equipped me with strong problem-solving skills and a deep understanding of complex systems. With extensive experience in both front-end and back-end development, I build websites that are not only visually appealing but also highly functional and user-centric. My portfolio includes recreations of well-known platforms like Apple, Netflix, and Amazon, showcasing my ability to deliver projects that meet industry standards. I excel in collaborative environments, where I can contribute to creating seamless and engaging user experiences. Continuously eager to learn and grow, I look forward to embracing new challenges in the ever-evolving field of web development.

## PROJECTS

- **Forum Project:** Designed and developed a forum application featuring user registration, post creation, and comment threads. Employed Node.js with Express for backend development and React for the frontend.
- **Garage App (In Progress):** Currently working on a garage management application, incorporating features such as inventory tracking, user management, and appointment scheduling. Utilizing modern technologies like React and Node.js.
